OLIVE SAMUELS

Full-Stack Software Engineer & Systems Architect | Dual Expertise in Web Development & IT Operations

Location: Abuja, Nigeria | Email: olivenkeechisamuels@gmail.com | Phone: 08070864314 | Official CV: https://olivesamuels.cv | GitHub: https://github.com/OliliSam |

==========

1. EXECUTIVE PROFESSIONAL SUMMARY

Highly motivated and detail-oriented IT professional with a dual expertise in fullstack web development and technical support, bringing a proven ability to build responsive applications, optimize system performance, and resolve complex technical issues. Passionate about leveraging technology to enhance operational efficiency and elevate user experiences, I excel in both independent innovation and collaborative environments to deliver high-impact solutions.

2. TECHNICAL COMPETENCIES & ARCHITECTURE MATRIX

- Frontend Engineering: React, Next.js, TypeScript, Vite, Tailwind CSS, Progressive Web Apps (PWA), HTML5 Canvas (2D/3D), Web Audio API, Redux Toolkit, Chakra UI, Framer Motion.
- Backend & Microservices: Node.js, Express.js, Microservices Architecture, RESTful APIs, Socket.IO / WebSockets, C# / ASP.NET, JWT Authentication, Role-Based Access Control (RBAC), Helmet HTTP Security, Resend & Nodemailer.
- Databases & Cloud: PostgreSQL, Supabase (Row Level Security & Realtime), PLpgSQL Stored Procedures & Triggers, MongoDB / Mongoose, Prisma ORM, Google Gemini GenAI SDK, Google Cloud Speech-to-Text.
- Systems & DevOps: Tauri (Rust Native Desktop Backend), Docker & Docker Compose, Git Multi-Branch Workflows, C# Windows Desktop (.NET), C Algorithmic Cryptography, RFID Protocol Parsing.

3. PROFESSIONAL EXPERIENCE & CAREER MILESTONES

IT Operations & Systems Development | Oxpier Consults (Abuja, Nigeria / Global)

- Managing IT operations, operational tooling, and internal systems development for business automation, client infrastructure, and enterprise workflows.
- Contributed across multi-developer branches on Oxpier One desktop and web platforms (Tauri/Rust, React, Supabase PostgreSQL, and PLpgSQL stored procedures).

Fullstack Developer (Project) | Medmate (Southville International School & Colleges • Manila, Philippines)

- Independently designed and developed a fullstack medication scheduling and reminder system engineered specifically for caregivers in nursing homes and assisted living facilities.
- Built automated multi-resident dosage scheduling with Node-Cron, electronic medication administration records (eMAR), hands-free voice notes via Google Cloud Speech-to-Text, and role-based access control.
- Reduced caregiver workload by an estimated 20% by eliminating manual dosage tracking errors and streamlining shift medication rounds.

Fullstack Developer | 3MTT Cohort 3.0 (Buddy Chat App • Abuja, Nigeria)

• Engineered and deployed a scalable real-time messaging application utilizing Socket.IO, Node.js, Express.js, Prisma ORM, and PostgreSQL.

• Containerized the application stack using Docker and Docker Compose for seamless local and production deployments.

• Authored Prisma relational models, migrations, authentication workflows, and database documentation.

Software Development Intern | CWW Tech Africa (Cohort 11.0, December 2025 – March 2026 • Abuja, Nigeria)

• Developed a responsive e-commerce web platform for an apparel brand using HTML, CSS, JavaScript, and Figma-based design workflows.

• Ranked among the Top 5 Interns for outstanding performance during the program, recognized for exceptional development skills and delivery.

IT Support Intern | Ecoloelements (Abuja, Nigeria)

• Provided technical support for hardware and software issues, resolving technical challenges across 50+ users.

• Assisted in maintaining system security and ensuring 99.9% uptime for local servers and network infrastructure.

4. EDUCATION, HONORS & ACCREDITATIONS

• Three Million Technical Talents (3MTT) Nigeria / NITDA: Software Development Fellowship. Certificate of Completion (Verify ID: FE/26/1106226085).

• Southville International School and Colleges (Manila, Philippines): Artificial Intelligence & Software Engineering coursework.

• CWW Tech Africa: Software Development Cohort 11.0 (December 2025 – March 2026). Software Development & Product Engineering.

• Honors & Awards: Top 10 Fellow (3MTT x Hello.cv), Top 5 Intern for Outstanding Performance (CWW Tech Africa), Comeback Star Award.

5. FLAGSHIP SYSTEMS & ARCHITECTURAL CASE STUDIES

ClearYes - Patient Informed Consent Platform (UI 3.0)

Status: Public | Role: Lead Fullstack Engineer & Architect | Tech: React, TypeScript, Vite, Tailwind CSS, Web Audio API, Canvas 2D, SHA-256 Crypto, PDF Export Engine.

• Next-generation HIPAA-grade healthcare Progressive Web App built for surgical clinics to replace dense paper consent forms with an interactive digital journey.

• Interactive 100-figure clinical risk pictogram with live node-level probability modeling and patient teach-back comprehension scoring.

• Canvas 2D cryptographic digital signature engine generating SHA-256 tamper-evident verification hashes.

• In-browser clinical audio synthesizer with animated visualizer and automated court-admissible EHR PDF exports.

Oxpier One - Enterprise Business Management Platform

Status: Private Enterprise Repository (Arin-15/oxpier-one) | Role: Full-Stack & Desktop Systems Contributor | Tech: Tauri (Rust), TypeScript, React, Supabase, PostgreSQL, PLpgSQL, Tailwind CSS.

• Native desktop architecture leveraging Tauri with a Rust backend IPC layer and React frontend.

• Complex relational database layer with 95KB+ of custom PLpgSQL triggers, stored procedures, and Supabase Row Level Security (RLS).

• Contributed across specialized feature and diagnostic branches: sam-c/diagnostics, sam-c/hopeful-cerf-3xxhx8, and sam-c/inspiring-ptolemy-dceotv.

• Integrated 'Oxie' conversational assistant answering directly from live workspace context.

Edumeet & Edumeet Microservice Backend

Status: Private Enterprise Platform (elion-Tech/Edumeet & elion-Tech/Edumeet_Microservice) | Role: Lead Fullstack & Cloud Architect | Tech: React, TypeScript, Google Gemini GenAI SDK, Paystack API, Node.js, Express, MongoDB, JWT, Helmet.

• Modern AI-integrated learning SaaS tailored for the African educational ecosystem with 24/7 Google Gemini-powered AI Tutor.

• Multi-currency localized tuition checkout integration powered by Paystack.

• Decoupled Node.js/Express microservice backend with strict Role-Based Access Control (Students, Tutors, Admins), rate limiting, and Resend email queuing.

MedMate - Nursing Home Medication Scheduling & Caregiver Reminder System

Status: Private Healthcare Platform (OliliSam/medmate) | Role: Fullstack MERN Developer | Tech: MongoDB, Express, React, Node.js, Redux Toolkit, Chakra UI, Google Cloud Speech-to-Text, Node-Cron.

• Medication scheduling and automated dosage reminder system built for caregivers managing elderly residents in nursing homes.

• Automated precision scheduling engine powered by Node-Cron dispatching timed dosage alerts across nursing shifts.

• Electronic Medication Administration Record (eMAR) tracking resident dosage adherence, caregiver verification, and zero missed-dose compliance.

• Hands-free clinical voice note logging for busy nursing staff streaming directly to Google Cloud Speech-to-Text.

• Active maintenance on dedicated hotfix/overload-bug-fixes branch resolving concurrency and alert scheduling safeguards.

Back to Bible (B2B) - 3D Interactive Scripture Study PWA

Status: Private Platform (OliliSam/back-to-bible) | Role: Sole Creator & Frontend Engineer | Tech: Vanilla ESNext JavaScript, HTML5 Canvas 3D, Web Audio API, PWA Service Workers.

• Zero-dependency high-performance PWA featuring interactive 3D Holy Bible canvas physics and procedural celestial sound synthesis.

6. MULTI-BRANCH WORKFLOWS & FORKED CODEBASES

• Arin-15/oxpier-one: Branches sam-c/diagnostics (telemetry/performance), sam-c/hopeful-cerf-3xxhx8 (feature sync), sam-c/inspiring-ptolemy-dceotv (database models).

• amStevee/Buddy-Hub-Chat-App: Branches feature/prisma (Prisma schema), chore/docker-setup (containerization), refactor/frontend, feature/signin-page, db-docs.

• Kritzkingvoid/FinalTerm_Project_EMS: Branch LoginAttendance/AddEmployeeDetails/Olive (biometric/session attendance tracking in C#/.NET).

• OliliSam/medmate: Branch hotfix/overload-bug-fixes (caregiver alert scheduling concurrency and voice buffering safeguards).

• Forked Repositories: OliliSam/Buddy-Hub-Chat-App, OliliSam/enigma-machine (C/C# cryptography), OliliSam/3Y_2324_IP2_MP1_MorseCode, OliliSam/3Y_2324_IP2_RingReader, OliliSam/3mtt_course_task.

• Additional Systems: OliliSam/journeymark (Artisan marketplace in React), OliliSam/Enigma (C# cipher engine), OliliSam/MidtermsProject, OliliSam/ConsoleApp1, OliliSam/Rings, OliliSam/UI-Project.
